

Literacy Design Collaborative Teacher Institutes

Reach Associates and the Kentucky Department of Education

Come join the expanding group of classroom teachers working through The Literacy Design Collaborative (LDC). Teachers across the state and nation are working together through a shared framework to build tasks and instructional modules that meet the cognitive demands of the ELA standards. LDC modules offer a new way for teachers to create robust tasks aligned with Common Core State Standards for use in Science, Social Studies and English Language Arts classrooms. The LDC Framework provides teachers a balance of guidance when implementing the instructional shifts and demands of the Common Core. The process intentionally provides ongoing opportunities for teachers to make decisions to adjust content and instructional strategies based upon student needs.

Certificates of participation for 6 hours of professional development credit per day will be offered.
